

This listing of claims will replace all prior versions and listings of claims in the application:

Listing of Claims

Claim 1 (currently amended) A method for measuring changes in skin of a human body comprising: obtaining a first three-dimensional image of the skin of a human body;
treating the skin of a human body to create changes therein;
obtaining a second three-dimensional image of the skin of a human body so treated;
overlaying the first three-dimensional image and the second three-dimensional image; and
comparing the first and second images to measure changes in the skin of a human body, wherein the images are obtained utilizing a non-contact optical profiling instrument that generates two flashes in a single shot, thereby enabling the production of the three-dimensional image from one shot.

Claim 2 (original) The method according to claim 1 wherein the measurement is a visualization.

Claim 3 (original) The method according to claim 2 wherein the visualization is accomplished utilizing lenticular printing.

Claim 4 (original) The method according to claim 2 wherein the visualization is accomplished utilizing a digital picture frame.

Claim 5 (original) The method according to claim 2 wherein the visualization is accomplished utilizing a personal data assistant.

Claim 6 (original) The method according to claim 2 wherein the visualization is accomplished utilizing a portable DVD player.
